

How we imagine the function „parent-child-connection“

Displaying parent-child connections

Actions

	<input type="checkbox"/>		Title		Document Type
1	<input type="checkbox"/>		new position for thumbnail icon		Freight rate list
2	<input type="checkbox"/>		test ksie 05042022		Template
3	<input type="checkbox"/>		Testdokument DMS LOG		frame contract / master agreement
4	<input type="checkbox"/>		Testdokument DMS LOG 01		frame contract / master agreement
5	<input type="checkbox"/>		Testdokument DMS LOG 01	↑ 1	frame contract / master agreement
6	<input type="checkbox"/>		Testdokument DMS LOG 01	↑ 1	frame contract / master agreement
7	<input type="checkbox"/>		Testdokument DMS LOG 02		frame contract / master agreement
8	<input type="checkbox"/>		Testdokument DMS LOG 02		frame contract / master agreement
9	<input type="checkbox"/>		Testdokument DMS LOG 03		frame contract / master agreement
10	<input type="checkbox"/>		Testdokument DMS LOG 03		frame contract / master agreement
11	<input type="checkbox"/>		Testdokument DMS LOG 04		frame contract / master agreement
12	<input type="checkbox"/>		Testdokument DMS LOG 04		frame contract / master agreement
13	<input type="checkbox"/>		Testdokument DMS LOG 05		frame contract / master agreement
13.1	<input type="checkbox"/>		Testdokument DMS LOG 01		frame contract / master agreement
13.2	<input type="checkbox"/>		Testdokument DMS LOG 01		frame contract / master agreement
13.3	<input type="checkbox"/>		Testdokument DMS LOG 01		frame contract / master agreement
14	<input type="checkbox"/>		Testdokument DMS LOG 05		frame contract / master agreement
15	<input type="checkbox"/>		Testdokument DMS LOG 06		frame contract / master agreement
16	<input type="checkbox"/>		Testdokument DMS LOG 07		frame contract / master agreement
17	<input type="checkbox"/>		Testdokument DMS LOG 08		frame contract / master agreement
18	<input type="checkbox"/>		Testdokument DMS LOG 09		frame contract / master agreement

Possibility 2:
with a symbol will shown, that
documents are a child

Possibility 1:
childs will be shown directly under
the parent

result list after run a search
-> parent- and child-documents and documents without a parent or a child will be list

- with a symbol the user can see, if a document is a child

4	<input type="checkbox"/>		Testdokument DMS LOG 01	↑ 1		frame contract / master agreement
---	--------------------------	--	-------------------------	-----	--	-----------------------------------

- with an additional function the child documents can be hide
- then at the parent document also a symbol should shown, that childs exist

		Testdokument DMS LOG 05	↓ 3
--	--	-------------------------	-----

Creation of new parent-child-connections

- starting point for adding new connection can be the property page of a document
- here the connection should be shown in a separate folder

Properties System Properties Authorizations Version Series **Related documents**

+ Parent documents

Button for adding a new parent document

	Creator (System)	Date Created (System)	Last Modifier (System)	Date Last Modified (System)
Testdokument DMS LOG 03		17.08.2018 13:07		17.08.2018 13:11

+ Child documents

Property-Page of a document without a connection

Button for adding a new child document

- after click on one the buttons the search can be started

- a search template will be opened to find the document to connect
- with marking a document in the result list of the search the marked document can be added a new child with click on "Apply selected rows"

Apply selected rows

	<input type="checkbox"/>		Title
1	<input type="checkbox"/>	Testdokument DMS LOG	
2	<input type="checkbox"/>	Testdokument DMS LOG 01	
3	<input type="checkbox"/>	Testdokument DMS LOG 01	
4	<input type="checkbox"/>	Testdokument DMS LOG 01	
5	<input type="checkbox"/>	Testdokument DMS LOG 02	
6	<input type="checkbox"/>	Testdokument DMS LOG 02	
7	<input type="checkbox"/>	Testdokument DMS LOG 03	
8	<input checked="" type="checkbox"/>	Testdokument DMS LOG 04	

+ Parent documents

Testdokument DMS LOG 03

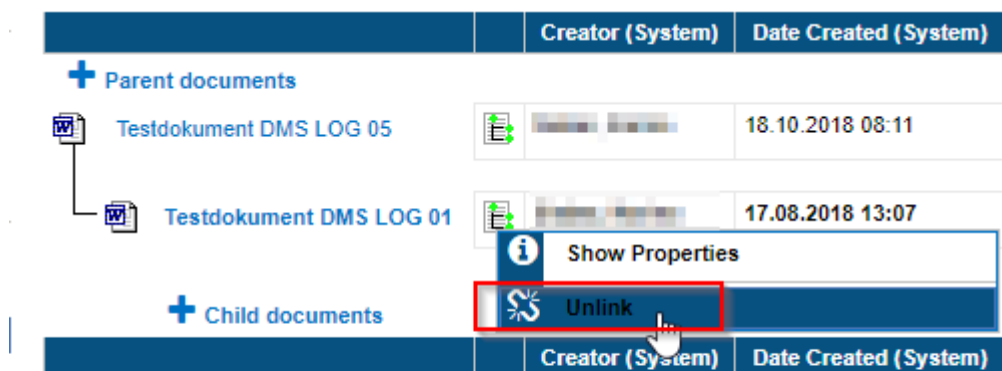

Testdokument DMS LOG 04

+ Child documents

- with Save the new connection will be saved
- for adding a new child or parent also an entry template can be opened to add/upload a new document as a new child or parent

Removing parent-child Connections

- if a connection should be remove, this can also be done in the “relations”-Folder at the property page with a separate button

- after saving the change the connection was removed
